

FocusRoom Testing Strategy

Expo web build + shared application logic

Core app logic

`test/focusMetrics.test.js`

Timer formatting

Dashboard totals

Saved session payloads

Elapsed minute calculation

Firebase models

`test/firestoreModels.test.js`

Firestore payloads

Snapshot mapping

Active room filtering

Invalid room rejection

Web smoke check

`scripts/check-web-server.js`

Checks local web server

Verifies app shell response

Does not touch Firebase

Does not automate Google login

npm test + npm run test:coverage

18 unit tests passed. Thresholds: lines 90%, functions 90%, branches 80%.
